Power BI Hands-On Labs

Ten progressive, self-contained labs for the WSQ course.

Each folder contains a detailed Markdown/PDF guide, a professional Excel intake/control/evidence workbook, and a Power BI starter file.

Lab	Level	Output	Folder
1. Connect, Inspect and Profile an Excel Dataset	Foundation	A profiled query with correct headers, types and documented quality issues	01-data-intake
2. Clean, Transform, Append and Merge	Foundation	A repeatable Power Query transformation pipeline with an audit trail	02-power-query
3. Choose Visuals for Trends and Correlations	Intermediate	A one-page analytical report using fit-for-purpose native visuals	03-visual-choice
4. Design an Accessible Report Story	Intermediate	A polished report page with hierarchy, theme, tooltips and accessible navigation	04-report-story
5. Build an Executive Dashboard and Scorecard	Intermediate	A Sales Monitoring dashboard and KPI scorecard in Power BI Service	05-dashboard-scorecard
6. Create Dynamic Interactions and Navigation	Intermediate	An interactive report with slicers, drillthrough, bookmarks and tested interactions	06-dynamic-interactions
7. Model a Star Schema and Date Dimension	Advanced	A semantic model with fact/dimension relationships and a marked date table	07-star-schema
8. Create Core DAX Measures	Advanced	Validated measures for Sales, Cost, Profit, Margin and share of total	08-dax-measures
9. Apply Time Intelligence and Scenario Analysis	Advanced	YTD, prior-period, Top N and what-if analysis with decision commentary	09-advanced-analytics
10. Deliver the GlobalTech Sales Performance Cockpit	Capstone	A stakeholder-ready PBIX report, dashboard evidence and QA checklist	10-capstone

Working convention

1. Download the complete repository ZIP or clone the repository.
2. Open each lab folder locally on a Windows computer with Power BI Desktop.
3. Work on a renamed copy of starter.pbix and retain the Excel Evidence sheet.
4. Use the detailed Learner Guide for supporting explanations and cross-lab context.
